AppStrap 3.0 Upgrade

Bootstrap core version: Bootstrap 4.0.0-alpha.5

Document last updated: Jan 3rd 2017

BEFORE YOU BEGIN BACKUP YOUR CURRENT THEME TO SOMEWHERE SAFE!

Themelize.me is not responsible for any lost data or broken functionality incurred as a result of attempting to upgrade. Themelize.me is also not able to provide support for upgrades or custom code.

While Bootstrap 4 is in development the AppStrap bundle will include:

1. **AppStrap 3.0** which supports Bootstrap 4
2. **AppStrap 2.5.6** which supports Bootstrap 3.3.x

The goal of this update was to prepare for the official release of Bootstrap 4 and give a base to add new features to AppStrap in the coming months. We also wanted to remove any custom code which can now be done with default Bootstrap 4 utilities in order to make the theme more flexible.

1. Bootstrap Markup Changes

You will need to alter your markup to reflect the Bootstrap 3.0 changes outline here <https://v4-alpha.getbootstrap.com/migration/>

2. AppStrap Theme Changes

REMEMBER TO BACKUP YOUR CODE BEFORE ATTEMPTING THE UPDATE!!!!

Make changes gradually on a development site and test as you go along.

1. Delete your sites/`css`, `/js` & `/img` directories and copy in the new `/assets` directory from the new version of AppStrap.
2. From your old theme backup copy your `custom-style.css` (all custom css code should go in this file) & any custom css files back into the `/css` directory. Do the same with the `/js` & `/img` directories as well if you added any new files.
3. Update the `<head>` (replace everything between the `<head>` & `</head>` tags)& footer (replace everything after the `</footer>` tag) code by copy and pasting from the 3.0 version.
This is important as it references to the plugin code now within the `/plugins` folder.
4. Implement the following changes within your code:
 - 4.1. CONTENT: Added class `list-inline-item` to add li within list-inline list, see: <http://v4-alpha.getbootstrap.com/content/typography/#inline>
 - 4.2. CONTENT: Change all use of `.img-responsive` class to `.img-fluid`, see: <http://v4-alpha.getbootstrap.com/content/images/#responsive-images>
 - 4.3. CONTENT: Updated sign up & login forms form markup, see: <http://v4-alpha.getbootstrap.com/components/forms/#form-controls>
 - 4.4. CONTENT: Replaced `.btn-default` use with `.btn-secondary`, see: <http://v4-alpha.getbootstrap.com/components/buttons/>
 - 4.5. CONTENT: Replaced `.btn-xs` use with `.btn-sm`, see: <http://v4-alpha.getbootstrap.com/components/buttons/>
 - 4.6. CONTENT: Replaced use of `margin-top-large` class with `mt-3` & new spacing utils, see: <http://v4-alpha.getbootstrap.com/utilities/spacing/>
 - 4.7. CONTENT: Replace `.label` class use with `.tag`, see: <http://v4-alpha.getbootstrap.com/components/tag/>
 - 4.8. CONTENT: Replace `.panel` class use with `.card`, see: <http://v4-alpha.getbootstrap.com/migration/#panels>
 - 4.9. CONTENT: Replace `.pull-left` and `.pull-right` with `.float-xs-left`

and `.float-xs-right` classes

- 4.10. CONTENT: Important! Replace all `col-*-push-*` & `col-*-pull-*` grid helpers with new `push-*-*` & `pull-*-*`, see: <http://v4-alpha.getbootstrap.com/layout/grid/#example-column-ordering>
- 4.11. CONTENT: Added new `.stat-header` class to `.stat` blocks (about.htm)
- 4.12. CONTENT+CSS: Removed `.inline-el` custom class in favour of `.d-inline` class, see: <http://v4-alpha.getbootstrap.com/utilities/display-property/>
- 4.13. CONTENT+CSS: Removed `.pad-left`, `.pad-right` & `margin-*-*` classes custom classes in favour of new spacing utils, see: <http://v4-alpha.getbootstrap.com/utilities/spacing/>
- 4.14. CONTENT: Reworked "All Plans include" block to use `bg-faded`, spacing utils & `d-inline-block` classes
- 4.15. CONTENT+CSS: Removed `.bordered-*-*` classes in favour of `<hr />` & new spacing utils, see: <http://v4-alpha.getbootstrap.com/utilities/spacing/>
- 4.16. CONTENT: Replaces `.de-em` class with `.text-muted` & `.font-weight-normal` Bootstrap classes, see: <http://v4-alpha.getbootstrap.com/utilities/typography/>
- 4.17. CONTENT: Removed `.primary-colour` custom class in favour of Bootstrap `.text-primary` class
- 4.18. CSS: Removed `.pull-center` custom class, use `.mx-auto` & `.text-xs-center` Bootstrap classes
- 4.19. CONTENT+CSS: REMOVED: `.text-light` class in favour of `.font-weight-normal` Bootstrap class
- 4.20. CONTENT+CSS: REMOVED: `.block-callout` custom class in favour of `.bg-faded` `.py-1` `.px-1` Bootstrap classes
- 4.21. CONTENT: Tweaked blog `.focus-box` to use `.float-md-right` & `.col-md-6` to control float point & width (blog-post.htm)
- 4.22. CONTENT: Improved comments display on blog posts with extended example
- 4.23. CONTENT: Tabs now need `.nav-item` & `.nav-link` classes applied to `li` & `a` elements, see: <http://v4-alpha.getbootstrap.com/components/navs/#tabs>

- 4.24. CONTENT: Updated all dropdown menus to new markup, see: <http://v4-alpha.getbootstrap.com/migration/#dropdowns>
- 4.25. CONTENT: `.header-search` & `.header-hidden` require the `.collapse` class to make them hidden on load (Javascript fallback in place)
- 4.26. CONTENT+CSS: Navbar & dropdown updated to use latest Bootstrap markup `.nav-item`, `.nav-link`, `dropdown-item` + `home-link` is now `nav-item-icon` to allow easy reuse of icon menu items
- 4.27. CSS: Add `.dropdowns-no-carets` wrapper class to hide Bootstrap default carets on `.dropdown-item` elements
- 4.28. 31. CONTENT+CSS: Dropdown custom `.menu-item` class is removed in favour of new `.dropdown-item` Bootstrap class
- 4.29. CONTENT: Mega menu `.img-link` class is removed in favour of `.hidden-md-down` Bootstrap responsive utils, see: <http://v4-alpha.getbootstrap.com/layout/responsive-utilities/>
- 4.30. CONTENT: Old headers are no longer supported, use AppStrap 2.5.6 if you need these.
- 4.31. CONTENT: Sidebar menus restructured as per new Bootstrap nav, see: <http://v4-alpha.getbootstrap.com/components/navs/>
- 4.32. CONTENT+CSS: `.bold-tabs` class has been renamed `.nav-tabs-bold`
- 4.33. CONTENT+CSS: `.panel-group` for accordions is now `.card-accordion` & `.panel-group-list-style` is now `.card-accordion-list-style`
- 4.34. CONTENT+CSS: Pricing tables migrated to use cards & utilities markup for greater flexibility, see: <http://v4-alpha.getbootstrap.com/migration/#panels>
- 4.35. CSS: Added custom `.bg-shadow` CSS class to apply box shadow to elements
- 4.36. CSS: Added custom `.border-*` contextual border colour helpers (i.e. `border-primary`)
- 4.37. CONTENT: Navbar collapse functionality updated to use `navbar-toggleable-*` classes , see: <http://v4-alpha.getbootstrap.com/components/navbar/#collapsible-content>
- 4.38. JAVASCRIPT: jPanel menu visibility now set by `data-toggle="jpanel-menu"` element visibility so plays with

`navabr-taggleable-*` classes (jRespond plugin removed)

- 4.39. CONTENT & CSS: Header user-menu & language menu structure changed to use default Bootstrap nav componenets, see:
<http://v4-alpha.getbootstrap.com/components/navs/>
- 4.40. CONTENT: Progress bars switched to HTML5 `<progress>` element, if you need IE9 support see:
<http://v4-alpha.getbootstrap.com/components/progress/#ie9-support>
- 4.41. JAVASCRIPT: Imagesloaded & Isotope plugins now loaded via CDN & plugins directories removed
- 4.42. CONTENT: Customers page now uses Isotope plugin & restructured items to use grid & cards components
- 4.43. JAVASCRIPT: Add `<script`
`src="https://cdnjs.cloudflare.com/ajax/libs/tether/1.1.1/js/tether.min.js"></script>` before the `bootstrap.min.js` file is included to use Tooltips & Popovers
- 4.44. CSS: Custom `.section-menu` is now called `.nav-section-menu`
- 4.45. CSS: Custom `.spacer` class has been replaced with use of `text-primary` & `font-weight-bold` classes
- 4.46. CONTENT: `id="navigation"` is now `id="header"`
- 4.47. CONTENT/JAVASCRIPT: Clingify plugin is replace, use `data-toggle="sticky"` instead of `data-toggle="clingify"`

3. Implementing New Features

Enjoy all the new features Bootstrap 4 has to offer:
